Tokyo Gas plans to use 11.89 mtpa of LNG by 2017

As Japan's economy begins to recover and industrial demand for energy grows, Tokyo Gas has predicted LNG sales of approximately 11.89 mtpa by 2017, equivalent to a 3% average annual growth over the next five years. The company plans to invest yen 745.7 billion (\$7 billion) in its facilities over the same period, including yen 105.7 billion for gas facilities, it said on Tuesday, when it outlined its supply plans for the next five years.
