Renewables and cheap US gas edging coal-fired plants toward ‘critical juncture’

US power markets are functioning properly, but the increasing role of gas and renewables in the country’s electricity mix have placed coal-fired plants on course toward a “critical juncture” in the coming years, the Department of Energy (DoE) said this week in a special report on the US power sector.

The wide-ranging paper commissioned in April by former Texas governor-turned-energy secretary Rick Perry concluded that economic factors such as cheaper gas and ...
