Stagnant coal's uncertain future now pivots on elusive carbon capture tech – IEA

As coal enters the second half of a decade of stagnant demand, it faces long-term decline as a primary energy source unless governments and companies take urgent action to promote carbon capture, utilisation and storage (CCUS) technologies.

“Without CCUS, coal use will be seriously constrained in the future,” said Keisuke Sadamori, the International Energy Agency’s director for energy markets and security, as he launched the agency’s latest ...
